

GEOS
Sustainable Surface

Introducing a brilliant new concept in surfaces.

Flecked with jewels of color in a dense, durable substrate, GĒOS blends recycled glass into a unique surface of superior strength and remarkable beauty.

Offered in a wide range of evocative colors, GĒOS makes a striking visual statement and is a rare find among environmentally conscious products—it's both earth-friendly and affordable. With a carefully chosen mixture of both post-consumer and industrial use glass, GĒOS gives new life to a cast-off resource. Combined with superior and proven binders, the resulting fusion of strength and beauty takes very little from the planet, and gives back an enduring product rich with colorful organic texture.

colors and patterns to

Marina

Cobalt and indigo scatter throughout a rich field of gray to suggest the deep waters of distant oceans. Blue glass of this hue is uncommon, making Marina an evocative choice.

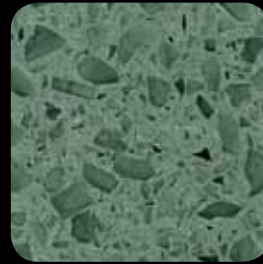

St. Lawrence

The subtle variation of smoky hues in an endless sky comes to mind in St. Lawrence. A consistently toned blend of translucent and transparent bits of glass in heathery shades of gray create a peaceful mood.

Mobile

This luscious blend of warm neutrals brings to mind soft sand along a pristine coast. Sprinkled with flinty specks and golden bits, Mobile's buttery surface warms up any room.

Aspen

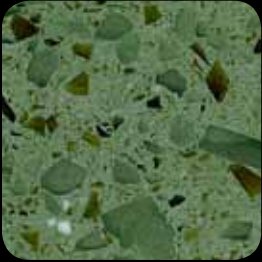

The dense blue-greens of an evergreen forest live on in this blend of subtly hued glass and quartz. Giving the consistent aura of an aged patina, Aspen is evidence of green's power to inspire.

Avalon

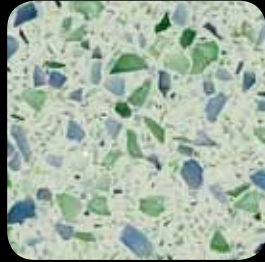

Lovely reflections of crystalline blue sky give Avalon a dreamy quality. From translucent azure to deep royal, there's a breezy range of hues here to lighten up your world.

match your aesthetic

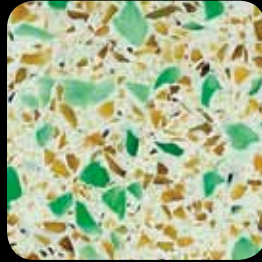

Fairfax

Rich olive notes and flecks of deep amber give Fairfax a decidedly solid feel. This multi-hued mix of glass combines with a consistent mossy base to suggest an old world feel.

Auckland

A lively mix of sea tones dances like light across the ocean surface. Aquamarine partners with hues of jade green, injecting a cool elegance in Auckland's playful display of color.

Asheville

Sepia tones meet soft seafoam hues to blend earth and water in beautiful harmony. Hints of cinnamon and topaz warm up the cool greens, giving Asheville richly patterned depth and an organic feel.

Kona

Bits of espresso and mocha-colored glass in a smooth café au lait base give this pattern its creamy appeal. Sophisticated but earthy, Kona sparkles with sunny warmth.

White Birch

Shades of gray are remarkably colorful in White Birch's mix of dove, ash, charcoal and silver tones. Against a pearly white base, this dappled blend makes a classic, subtle and confident statement.

GĒOS is eco-friendly through and through.

Developed by ĒOS, the solid surface innovators, GĒOS makes a beautiful impact for all.

earth-friendly

- Recycled glass finds new life in GĒOS, much of it from post-consumer or industrial discard sources.
- Engineered for superior strength and long-lasting durability, GĒOS has the potential for years and years of use – an indefinite life-cycle that promises less waste destined for landfills.
- GĒOS is a low VOC product and uses **no** CO₂-intensive, fossil fuel-driven Portland cements, requiring less energy to manufacture and resulting in a lower alkaline content for greater stability and stain resistance.

fabricator-friendly

- GĒOS is performance-tested for superior strength and stability, so it is reliable through cutting, handling, fabrication, installation and years of use.
- Because GĒOS production involves computer-controlled dispensing of materials, patterns are consistent in distribution of size and color, making finished installations beautiful.
- GĒOS is a consistent surfacing material available in 3cm and 2cm depths for ease of fabrication.

budget-friendly

- GĒOS is designed to combine high visual impact with a feature that's rare among environmentally responsible products—affordability.
- GĒOS requires little to maintain its durable, scratch-, stain- and heat-resistant beauty. Just clean with mild household cleansers, avoid harsh chemicals, use trivets under hot items and protect against excessive force that may mar or chip the surface.

GĒOS carries a 10-year Limited Warranty. See our warranty information at eos-surfaces.com
