texturing stone...  
WANT TO TRY "THAT NEW PAD"?  
want to learn top polishing... like that new air polisher?  
TRY SOME NEW SEALERS... HEARD ABOUT SCRATCH REPAIR...  
try new seaming glues... **STEP INTO "THE CAGE"**

### One X-Treme Venue

Imagine an annual convention held in the tradition of the highly-successful, hands-on Stone Fabricator's Alliance Workshops. Fabricators teaching fabricators with real world equipment and gear. The SFA is, once again, hosting its highly successful "Megaworkshop" with a celebration of fabrication, education and presentations! You will again see machine manufacturers, equipment suppliers and tool vendors coming together in an environment designed to promote learning. Machines will be running at full speed, (not in simulation), making real kitchens from real stone in real time.

### X-traordinary Education

Our education program is designed by Fabricators for Fabricators. Seminars covering numerous industry-related topics like "how to set up a digital shop", "understanding fabrication and business costs", Importing Stone, Creating a Templating Protocol, will be held daily. All SFA Seminars are free for attendees. Where else can you find highly successful fabricators helping other fabricators become successful for free? Discover how to improve your operation, increase your efficiency and learn tricks of the trade from those leading the industry. Interested in raising the bar in the stone fabrication industry? Attend the MegaWorkshop! (Step into the "Cage")

**YOU ARE GOING TO GET "WET!"**  
THE STONE FABRICATORS ALLIANCE presents the... **"CAGE"**

Once again the Stone Fabricators Alliance sets new boundaries where Fabricators help Fabricators learn new tricks and techniques using the best equipment on the market. "The Cage" is an all-wet, hands-on, fabrication area where you are actually able to test drive tools and gear supplies by our Sponsors. A vendor claims to have the best polishing pad or blade available? Step into the Cage and we'll see.
